HOW TO USE THIS GUIDE

This stamp shows which companies offer cooperate studies, also known as combined dual studies.

This tick shows which companies offer training or work experience abroad.

MESSAGE

FROM PRESIDENT

Welcome to this year's Job Fair TalentConnect @ECRI 2026!

It's a real pleasure to have so many of you here today — students full of ambition, and about 15 companies who have taken the time to come here and meet you in person.

I'd like to extend a warm welcome to our business partners. Many of you are from smaller and medium-sized enterprises rooted in our rural region, and your presence here means a great deal to us. You are the backbone of our local economy in the Rottal, and you offer something that large corporations often cannot: the chance to make a real impact from day one, to grow alongside a company, and to be known not as an employee number, but as a person.

To our international students: today is an opportunity. Don't just walk past the booths — stop, ask questions, introduce yourselves. Talk about your studies, your interests, your ambitions. A good conversation today could be the beginning of an internship, a thesis project, or even your first job after graduation. Building a professional network isn't something you do once you've graduated — it starts now, with the people you meet in this room.

So please take this chance. Be curious, be confident, and make the most of the connections you build today.

I wish you all a successful day and an inspiring Job Fair here at our DIT Campus in Pfarrkirchen. Thank you.

Prof. Waldemar Berg
President DIT

WELCOME

FROM FIRST CONTACT

Dear Exhibitors,
Dear Prof. Berg,
Dear mayor Beißmann,
Dear Professors and Students,

It is a great pleasure to welcome you to this year's TalentConnect at the European Campus. The growing interest in this job fair over the past years shows that both companies and students highly value the chance to connect, share ideas, and explore new opportunities together.

TalentConnect is a great chance for European Campus students to connect with company representatives from a wide range of industries, whether for study theses, internships or career opportunities. We are proud to announce that this year, the European Campus has recruited 14 companies for its own job fair.

Thanks to the excellent education provided at European Campus, our students have the potential to become highly skilled, motivated professionals with strong social and interpersonal skills.

Making a positive first impression is just as important as specialized knowledge. The Career Service offers various seminars to help students improve their communication and application skills, ensuring they can confidently present themselves to company representatives.

We also hope that professors will seize this opportunity to explore potential joint projects with DIT, giving students valuable insights into real working life during their studies.

We would like to express our sincere gratitude to the Career Service and DIT for their support, and we are proud that together we have made this job fair possible. Special thanks go to Prof. Berg, the First Contact team, and the staff members of DIT and European Campus for their dedication, as well as to the Career Service for the outstanding planning of the 7th job fair.

On behalf of First Contact e.V., I wish you an inspiring and successful job fair, full of meaningful connections and exciting opportunities.

Anneliese Schützenberger
Chairwoman, First Contact e.V.

Pfarrkirchen, 28 October 2026

Application as electrical engineer, your offer on the DIT job platform

Dear Mr./Ms. Eckinger,

research the contact person

Thank you very much for the informative and friendly talk at the Job fair European Campus in Pfarrkirchen on 28 October 2026. This once more encouraged me to apply as an electrical engineer with knowledge in developing and controlling in automotive electronics.

Try to write an interesting introduction without empty phrases

I am currently writing my bachelor thesis about "Conceptualizing and developing control devices in cars". I have already gained theoretical knowledge at Deggendorf Institute of Technology in the technical electronics major, which is about automotive electronics and their programming. Before my studies, I worked as an electronics engineer for two years. Self-reliant project work was a crucial part of my tasks. Therefore, I am used to structured and target-oriented work. During my internship at Auto AG, I worked with technology and administration specialists and was able to gain experience in multi-functional teams.

Body:
What experience and professional skills can you contribute? Try to give examples that proof your soft skills. Try to address the demands in the job offer.

In the course Control Units in Cars, I was able to proof successfully my analytical skills. The course aim was to research the function of control units and program them for certain tasks. I particularly enjoyed analyzing complex problems and finding a solution.

At the "Bewerbertraining" seminar at Deggendorf Institute of Technology, I was able to gain first positive insights into your industry-leading company.

I would like to support your company by January 2027.

I am looking forward to an invitation for an interview.

Complimentary close

Relation between you and the company.
Motivation for application.
Possible date for you to start.

Yours sincerely
